(54) FACSIMILE COMMUNICATION EQUIPMENT

(57)Abstract:

PROBLEM TO BE SOLVED: To perform communication considering a communication cost in facsimile communication through a PSTN (public switched telephone network) and to utilize the maximum ability of a facsimile transmitter for the facsimile communication through an internet in a facsimile communication equipment capable of the facsimile communication through the internet.

SOLUTION: An address of only the PSTN or an IP address through the internet is registered in a registration circuit 24 corresponding to a calling destination beforehand. Then, in the case that the facsimile communication is selected, a control circuit 20 tries the communication in a communication mode (resolution) set beforehand when the address of only the PSTN is registered corresponding to the calling destination and tries the communication in a mode higher than the communication mode set beforehand when the IP address through the internet is registered for the calling destination on the other hand.
